Benchmarking & Performance Measurements (BPM)

- **Current WG Hot Topics/Main Issues**
  - draft-ietf-ippm-stamp-ext-hdr related work, draft-ietf-bpm-stamp-mpls-hdr, draft-ietf-spring-stamp-srpm-mpls and draft-ietf-spring-stamp-srpm-srv6 from MPLS and SPRING, presented at BPM IETF 127 to encourage more cross review.
  - Alternate Marking YANG and IPFIX data modelling in BPM and OPSAWG. Coordinated WGLC.
  - Good amount of proposed work on performance measurement, benchmarking, some IOAM and agent related. 6 documents in RFC editor, 1 at IESG, 2 in WGLC and 6 documents in adoption queue.
  - NET4AI RG cooperation.
- **Admin Changes Since IETF#126**
  - Chartering concluded. BPM established since October 29th. Paint still wet.
  - Leadership Update: Marcus Ihlar, Giuseppe Fioccola and Thomas Graf appointed as chair, Sarah Banks as Tech Advisor.
- **Main Achievements Since IETF#126**
  - draft-ietf-ippm-qoo, draft-ietf-ippm-stamp-ext-hdr, draft-ietf-ippm-ioam-data-integrity, draft-ietf-ippm-ioam-integrity-yang, draft-ietf-bmwg-network-tester-cfg and draft-ietf-bmwg-sr-bench-meth in RFC Ed Queue
  - draft-ietf-bpm-alt-mark-deployment submitted to IESG.
  - draft-ietf-ippm-alt-mark-yang concluded the WGLC.
  - draft-ietf-ippm-encrypted-pdmv2 addressed reviews from SECDIR, INTDIR and TSVART and now ready for second WGLC.
  - draft-ietf-bpm-stamp-mpls-hdr and draft-ietf-bpm-stamp-ber has been successfully adopted.
  - draft-yl-bpm-cats working group adoption call ongoing.
- **Perfmetrdir Updates Since IETF#126**
  - draft-ietf-cats-metric-definition and draft-ietf-ippm-stamp-ext-hdr reviewed. draft-ietf-mpls-mna-ioam review in progress.

BPM Chartering Recap

- IPPM and BMWG joint Sessions have been experimented since IETF#123
  - IETF#123, IETF#123, IPPM&BMWG Joint Interim, IETF#125, IETF#126
- IPPM and BMWG joint charter has been first incubated in IETF#125 and publicly discussed on both ML and converged in IETF#126
- The working group proposed to include a statement that documents in general require implementations and in certain circumstances exceptions can be applied, however during IESG review this has been pushed back as being ambiguous. Chairs decided to include in chairs slides instead.
- The new WG (BPM) has been finally created in October 29, 2026 after IETF#126
  - As the successor of IETF BMWG and IPPM WGs
  - Thanks to everyone for the great contribution and inputs to BPM charter consolidation and constructive inputs through this process

BPM Working Transition Status

Transition Tasks	Time Frame	Status
BPM Creation	2026-10-29	Done
Send LSes to ITU-T, IEEE, 3GPP, BBF, and ETSI about BPM (Liaison Statements - Posted)	2026-11-05	Done
Move IPPM and BMWG Subscribers to BPM	2026-10-29	Done
Close IPPM and BMWG Mailing list	2026-11-04	Done
Redirect email from IPPM and BMWG to BPM ML	2026-11	Done
Update BPM ML to point to IPPM and BMWG Archive https://mailman3.ietf.org/mailman3/lists/bpm@ietf.org/	2026-11	Done
Update Datatracker pointing to IPPM/BMWG archives https://datatracker.ietf.org/wg/bpm/about/	2026-11	Done
Move WG drafts, Published RFCs and New proposed I-Ds to BPM datatracker: https://datatracker.ietf.org/wg/bpm/documents/	2026-11	Done
Close IPPM/BMWG WGs and add a note that BPM is the successor	2026-11-04	Done

BPM Working Transition Status

Transition Tasks	Time Frame	Status
Inform IPPM and BMWG draft authors to resubmit and rename the WG drafts and proposed I-Ds: Pending draft-ietf-ippm-* and draft-ietf-bmwg-* are reassigned to BPM	2026-10-30 ~	Work in Progress
Track Documents & Implementations in BPM Github Organization		Work in Progress
How to make good use of WG Session Time		Work in Progress
Coordinate with other WGs within IETF		Work in Progress

How to Make Good Use of WG Session Time?

- **Some concerns raised during BMWG and IPPM joint charter discussion**
  - **Less focus, Less time** for existing work items and new work
  - **Slow down progress** of existing work or individual drafts
- Some proposals for WG Chairs to consider:
  - Reach out to authors to request status and plan meeting agenda early
  - Allocate time based on mailing list and implementation activities
  - Request 2 sessions during IETF week
    - Each with 2 hour time length
    - One session with 2 hour time length and the other with 1 hour time length
  - Request Interim meetings for a dedicated topic requiring more discussions
  - Encourage design team meeting between IETFs

How to Coordinate with Other IETF WGs

- Plan Deep Dive on Benchmarking and Performance Measurement Tutorial
  - Increase awareness as a whole and call for contributions
- Joint Session with other relevant WGs for Common interests Topics
  - E.g., BPM and CCAMP joint session on PM streaming
- Encourage more coordination between IRTF and IETF
  - MAPRG and BPM coordination
  - NET4AI RG and BPM coordination

Track Documents & Implementations

- Renamed github organization to https://github.com/ietf-bpm-wg
- Update github organization with
  - Measurement tools and protocol implementations
  - Benchmarking Implementations
  - Hackathon project outcome
  - Testbed and Test set resources
